RE: GE Healthcare Software Terms of Non-Resale

Dear Diana:

It is our understanding that as a broker/dealer of used healthcare equipment you might have occasion to purchase used GE Healthcare equipment from original equipment purchasers. In such cases, the equipment you purchase may contain software that was sublicensed to the original equipment purchaser and subject to various terms and conditions, including restrictions on the resale or the transfer of certain software licenses. Please be aware, unless otherwise explicitly stated by GE Healthcare in writing, software that is not part of the equipment's base system standard operating software is non-transferable and only the original equipment purchaser has a non-exclusive, limited license to use such software.

If you have any questions concerning what software GE Healthcare identifies as the base system standard operating software on equipment you have purchased, please contact the following individuals:

John Berg (CT)	(262) 312-7276
Jeremy Rady (MR)	(262) 548-2697
Wayne Euclide (DGS & MI)	(262) 312-7032

Thank you in advance for your cooperation.

Very truly yours,

GE Healthcare
